Although the current coolant was green, I assumed that it was just the color of Hyundai's dye used for their Dex-Cool coolant. Interestingly enough, the Dex-cool was not as dense, as it sank to the bottom of the reservoir. The recommendation in the owner's manual called for an aluminum-safe ethylene-glycol mix. It's my understanding that any Asian vehicle manufactured after 1996 uses anti-freeze equivalent to Dex-Cool, but not GL-5, correct?"
